## Summary

---

Full-Stack Developer with 3+ years of experience in ASP.NET Core and React application development, with exposure to Flutter for cross-platform mobile apps. Experienced in REST API development, performance optimization, asynchronous processing, and Agile-based delivery.

## Experience

---

### Associate Software Developer

Dec 2022 – Present

B2A Technologies Private Limited

### Dhanman – Apartment & Business Accounting Management Platform

- Developed and maintained RESTful APIs using ASP.NET Core, ensuring scalability and reliability of backend services.
- Improved frontend performance using React.js with efficient state management and lazy loading, achieving approximately 15% faster load times.
- Built reusable and responsive React components, improving UI consistency and user engagement.
- Used RabbitMQ with MassTransit for asynchronous background processing of notifications and reports.
- Supported CI/CD workflows using Jenkins and GitHub Actions.
- Used Prometheus and Grafana dashboards to monitor API latency, throughput, and error rates.
- Collaborated with cross-functional teams and actively participated in Agile ceremonies.

### Mobile Project (Flutter): Dhanman – Apartment Management Application

- Developed cross-platform mobile application using Flutter for Android with responsive UI components.
- Designed and implemented backend REST APIs using ASP.NET Core to support mobile features such as authentication, data retrieval, and transaction workflows.
- Integrated Flutter application with custom-built ASP.NET Core APIs for secure data exchange and synchronization.
- Implemented form validations, reusable widgets, and state management to ensure smooth user experience.
- Collaborated closely with backend, web, and product teams to align mobile and server-side logic with business requirements.

## Skills

---

**Backend:** ASP.NET Core, C#, REST APIs

**Frontend / Mobile:** React.js, React TypeScript, Flutter, JavaScript (ES6+), HTML5, CSS3

**Databases:** SQL Server, PostgreSQL

**Messaging:** RabbitMQ, MassTransit

**DevOps & Monitoring:** Git, Jenkins, GitHub Actions, Prometheus, Grafana

**Methodology:** Agile / Scrum

## Certifications

---

Complete C# Masterclass — Udemy

Foundational C# with Microsoft Certification — freeCodeCamp + Microsoft

## Education

---

**B.Sc. (Chemistry)**

2018

Shivaji University, Kolhapur
